Military Technologies

UNITED STATES MARINE CORPS

PRE-FILLED TOUCH-UP KITS

MILSPRAY's pre-filled CARC touch-up kits, available in aerosol, brush or roller applicators, are self-contained with all items required to perform minor touch-up, such as protective gloves, sanding block, and lint-free tack cloth. Because of the small quantity of paint that is contained in each individual kit they can be shipped by standard commercial means without incurring hazardous material handling fees. Please reference the USMC CPAC website at https://www.marcorssyscom.usmc.mil/cpac/paint_list.asp for authorization information.

MILSPRAY CARC touch-up products are used by the U.S. Marine Corps worldwide. They preserve and restore the IR signature reduction and chemical and biological agent resistance properties of the original CARC application. IR homing weapon systems use a vehicle or aircraft's IR signature for target identification and destruction. Using non-compliant, non-mil spec, commercially available aerosol touch up paints creates a hot spot and substantially compromises the signature reduction properties of CARC.

MILSPRAY is a QPL manufacturer of MIL-DTL-64159 TY III CARC

UNITED STATES MARINE CORPS PRE-FILLED TOUCH-UP KITS

MILSPRAY is a QPL manufacturer of MIL-DTL-64159 TY III CARC

TECHNICAL INFORMATION

CARC Material.....MIL-DTL-64159 TY III CARC
(Water Borne Camouflage)
Volume.....70ml / 2.37 ounces
Kit Coverage.....2 to 3 sq ft @ 1 MIL DFT
Quart Coverage.....100 sq ft @ 1 MIL DFT
Recommended DFT.....1.8 - 2.3 mils
Pot Life.....4 hrs
Dry Time Touch*.....45-60 min
Dry Time Handle*.....6-8 hrs
Recoat Time*.....8-10 hrs
VOC......84 lb/gal as applied
Storage Temp.....50-80°F
Shelf Life.....1 yr *@77°F/25°C

Brush and Roller applications may require 2 coats to achieve desired DFT
