

MILSPRAY®

Military Technologies

U.S. AIR FORCE

MILSPRAY® is currently contracted (N40192-16-D-7011) to wash Aerospace Ground Equipment (AGE) & Military aircrafts at Andersen Air Force Base in Guam. All aircraft washes are under the supervision of the wash Site Manger and the appointed dedicated Crew Chief, in accordance with applicable AF technical orders/publications. MILSPRAY® fully prepares B-52 & KC-135 aircrafts for wash, minus installing locks, opening & closing panels and aircraft forms documentation. MILSPRAY® services includes masking, washing, de-masking and lubrication. Servicing also includes completion of forms documentation and Integrated Maintenance Data System (IMDS) on all AGE units. MILSPRAY® only uses approved cleaning compounds/solutions, in accordance with T.O. 1-1-691, which are diluted and mixed as required. MILSPRAY® also performs lubrication in accordance with AF technical orders publications.

Over 300 aircraft units washed | Andersen Air Force Base - Guam

"Flawless Restoration"

"The Air Force Corrosion and Prevention Control Office (AFCPCO) conducted a portion of the 5 Year MAJCOM Corrosion Survey for PACAF. The TCGM site was visited as part of this survey. Various pieces of equipment were also inspected by the AFCPCO team for quality of refurbishment. Retired CMSgt Dan Mars from the AF Corrosion Office mentioned that the refurbishment that the TCGM folks had been performing thus far was the best he had seen from a contracted effort in his many years in the business. He also mentioned this should be a highlight in the 5 year MAJCOM survey when it gets written. Congrats to your team! Keep up the outstanding work." - MSgt Bradley L. Bove, USAF
