## VEHICLE REPAIR SERVICE

For over 15 years, MILSPRAY® has been performing services on U.S. military vehicles and equipment. Now, in support of the DoD 1033 Program we are providing those same services to municipalities. Often times HUMVEES received by local towns have mechanical issues that must be addressed for safety and general maintenance reasons. Leaks, worn tires, rough running engines, missing or damaged components are just examples of the many vehicle problems we address every day at MILSPRAY®. Our mechanics have access to the largest inventory of HUMVEE parts available anywhere.

### Vehicle Repair & Maintenance Services

- Engine/Transmission leaks
- Tires
- Brake Problems
- Lights
- Exterior Components (Mirrors, Doors, Bumpers, Wiper Motors, Winches)
- Suspensions
- Exhaust Systems
- Bodywork and Painting
- Oil Change and Lube

## About Us

We employ highly trained and skilled technicians who are well versed in military vehicle repair, bodywork, and painting. Additionally, since we are a registered U.S. Department Of Defense military contractor (Cage Code: 3NXX3) we have access to all of the parts required to maintain many military vehicles including HUMVEES. Our Lakewood, NJ facility is centrally located in the state and houses some of the largest repair equipment anywhere. This equipment is required to work on vehicles that simply cannot be serviced by local garages or body shops due to their size.

## Painting & Bodywork

We specialize in the “de-militarization” of military vehicles. We perform bodywork and convert the vehicle from military camouflage to your municipality’s preferred colors and even apply your town crest and designated vinyl lettering.

## Upgrades

We offer economical upgrades to your 1033 Program vehicles. Some of our more popular upgrades include:

- High water fording kits (5ft)
- Tough Coat™ bed liners
- New upgraded bucket seating
- Keyed ignition installations
- Canvas to metal doors
