Tectyl® Undercarriage Coatings

Protect Your Vehicle's Undercarriage

- Military-grade, the only undercarriage coating used by the USMC.
- Protection Against Sand, Salt, Moisture, Flying Rocks, and Debris.
- Engineered For Short or Long-Term Protection as well as Indoor or Outdoor Exposure.
- Features an Excellent Chip Resistance Rating on the Gravelometer Scale.
- 100% HAPS-Free (Hazardous Air Pollutants).
- Watertight Seal that Resists Corrosion and Rust.

Rustproofing Annual Corrosion Protection

T-32 Rustproofing product and service is not an undercoating, it is a body maintenance program. Unlike an undercoating, Rustproofing provides protection to your whole vehicle and it cannot be chipped or cracked. The ultra thin film creeps and crawls into seams, cracks and crevices where corrosion begins and provides an active barrier between the metal and the causes of corrosion. This is an active product that is best applied before the metal is corroded, however, if your vehicle is already rusty, it can also be used to slowdown the corrosion process. Reapplication every 6-18 months, depending on location, guarantees protection to your vehicle.

Untreated

Treated

Features & Benefits

- Reduction of maintenance hours.
- Reduction of replacement parts, brake cables, oil and transmission pans/bolts, and battery compartments.
- Reduces electrical wiring breakdowns caused by corrosion, or the greening of wires.
- Reduces wear on windows, lock assemblies, door pins, hood and trunk hinges.
- Can be applied on new, used or even rusty vehicles.
- On-site mobile service. We come to you with trained service technicians.
- Approved and recommended product and service by Pierce Manufacturing, the premier manufacturer of Fire, Rescue and Emergency Vehicles.
- Environmentally Friendly, Non-Flammable and cleared by the Surgeon General.
- Qualifies for State Funding.

Tough Coat™ Bed Liners

Military-Grade Coatings

Tough Coat™ is a lightweight, nearly indestructible, military-grade, integrated polyurea coating system that provides the ultimate in water repellent technology and enhanced corrosion protection. Although typically applied in black, Tough Coat™ can be special ordered in almost any color. More than “just a bed-liner,” Tough Coat™ can also be applied to high wear areas, bumpers, rail guards and plow blades, providing enhanced protection in these areas as well. Tough Coat™ is the only bed-liner approved for use on United States Marine Corps vehicles & assets.

Fleet Washing

Remove Corrosive Agents

MILSPRAY® Fleet Wash service is the first step in slowing the corrosion process. Maintaining a regular cleaning schedule removes corrosive agents like salt, oil, and grime – extending the life of your vehicle's exterior paint and undercarriage. We use industry leading Hotsy® Power Washers, along with environmentally friendly biodegradable and non-corrosive cleaning agents to protect your fleet, the environment and your wallet from fines. We come to you at your convenience and set up a large collection basin, all waste water will then go through our collection system that will isolate and contain dirty water which will then be removed from the premises.

Past Performance

Proven & Trusted

MILSPRAY® has provided Corrosion Prevention, Control and Repair (CPAC/R) services since 2003. We offer a diverse suite of services that address any surface treatment and protection challenge for both military and commercial applications.

MILSPRAY® has serviced over 15,000 military assets helping the U.S. DOD achieve its mission of extending the useful life of all military tactical ground and ground support equipment.
